**Object:** Execution of Diving Services for pipelines in Garda Lake
Contract n. 1095704818 – "Garda Lake Project : rehabilitation sewer pipelines"
Contract n. 1095706965 – "On-call service on Garda Lake"
Contract n. 1095705188 – "Water pipelines maintenance on Garda Lake"

On behalf of Acque Bresciane, I am writing to express our satisfaction and commendation for DRAFINSUB's performance in the execution of diving services for the maintenance of the sewer and water pipelines in the Garda Lake.
The cooperation started in 2018 and the most important project is the rehabilitation of the two pipelines which cross the lake from Toscolano Maderno to Torri del Benaco, by the positioning of mechanical clamps in the corroded sections between 40 m and 237 m of depth. The saturation diving operation conducted by your proficient team of divers was carried out with remarkable professionalism, ensuring the highest standards of safety and adherence to project requirements. Your team's expertise and dedication were instrumental in achieving the project's objectives without any incidents, showcasing the high level of operational capability and safety culture that DRAFINSUB upholds.

Deliveries have been punctual, communication has been clear, and any issues have been resolved promptly and effectively.

We look forward to continuing our collaboration with DRAFINSUB on future projects and are confident in your ability to consistently perform at such level.

Yours sincerely.

Chief Operating Officer
